FSMA Exceeds Campaign Goal.

\$127,000 Raised

[FSMA Home Page](#)

[Read the Blog](#)

FSMA has invested \$3.4 million in clinical trials to date. Our leading operational clinical network has completed 2 trials and has another 3 trials in progress at 7 sites.

Our research is now advancing to the stages of testing treatments for SMA in human clinical trials. However, we need to grow our network with more sites to allow for better regional coverage for easier patient travel and recruitment into trials.

Our campaign goal here is to try and raise \$120,000 which would be enough to support the annual costs for one site in our clinical network.
