

Please join us for a benefit in honor of Ford Sniezek. Ford is the son of Scott and Kayla Sniezek of Portersville. Ford was recently diagnosed with SMA. SMA is a devastating genetic disease that destroys the nerves that control voluntary movement. Children born with SMA may never crawl, walk, or even lift their head. Families who live with SMA turn to Families of Spinal Muscular Atrophy for information, guidance, encouragement and most importantly; HOPE. Please help us help them.
